** Please note that this list is subject to availability and some combinations may not be possible*

A levels are the 'gold standard' qualification for entry to university and higher education. Choosing the right subjects is vital for a young person's future. Our programme of A level qualifications is designed to offer students a wide choice of subjects that will provide you with a solid foundation to achieve your aspirations.

When choosing your subjects think about your future aspirations and make sure you check which subjects are essential or desirable for a particular course/career pathway.

Common misconceptions:

- **"I wish to become an Accountant or Actuary or work in the City so I must study Economics and Mathematics at university."**
- *In fact these professions are open to any graduate: 5% of Engineering and History students typically take up these jobs on graduation.*
- **"I must do a degree (and therefore A Levels) linked to a vocation to be sure of getting a job."**
- *In fact fewer than 5% of jobs in the commercial and business sector require specific degrees.*

Make sure you do your research before you make your choices.
