

# ARTIFICIAL INTELLIGENCE CONFERENCE

A group of Sixth Form students attended an inspiring AI-focused event at Queen Mary University, exploring the impact of artificial intelligence on education, the environment, and mental health.

The event featured insightful discussions, live performances, and engaging presentations from young researchers, fostering a deeper understanding of AI's role in shaping the future.

From thought-provoking pitches in the *Visions of the Future of AI* session to the *Teenagers' Lives Online* panel discussion in collaboration with the NSPCC, students had the opportunity to engage with experts and fellow young minds passionate about AI and technology.

This event provided a unique platform to spark curiosity and encourage the next generation of AI innovators.
